

What is MyMeter?

MyMeter provides a detailed view of how you use electricity in a variety of user-friendly ways. It also offers a number of tools and resources to help you manage your electric use. With *MyMeter*, you can:

- View electric use by time & date intervals (from 15-minute to monthly)
- Create energy-use thresholds and receive usage alerts
- Set energy markers to note significant events and track changes related to electric usage
- Get helpful energy-saving tips and easily download electric usage data
- Access energy efficiency programs and complete an online Home Energy Snapshot
- Use the built-in Rate Comparison Tool
- Customize how widgets are displayed

To access *MyMeter*, log in to [MyAccount](#) and select **MY METER** from “My Account Dashboard.”

1. Usage Dashboard

- a. Toggle between kilowatt-hour (kWh) or dollars.
- b. View by 15-minute, 30-minute, hourly, daily, weekly, monthly and billing intervals.
- c. Set energy markers to visualize your consumption patterns during a specific time frame.

2. Alerts

- Usage Threshold** – Set a usage and/or dollar amount threshold for a specified time interval. You can choose to receive a text and/or email alert when your electric use is over (or under) the set amount.
- Energy Bill Watch Alerts** – Provide a snapshot of your energy use and estimated cost after the 10th and 20th days of your billing cycle, so that you can plan and make changes to help manage your energy bill.
- Weekly Usage Summary** – Sign up to receive an email with more information about how you use electricity.

3. Data Download

- Navigate to the  button and select “Data Download.”
- Select a 15-minute, 30-minute, hourly, daily, weekly, monthly or billing interval and date range.
- Choose columns to include, such as account number, kWh and/or dollar amount, and customize the display order.
- Download a CSV file for Microsoft Excel.

4. Savings Tips

- a. Learn about ways you can reduce your usage year-round.

5. Home Energy Snapshot

- a. Answer some basic questions about your home and you'll receive a detailed report containing personalized energy savings tips and recommendations.

6. My Energy Portal

- a. View recent energy usage and get relevant energy-saving tips.
- b. See a breakdown of how your home uses energy and how your usage compares to other households in the area.

Add an Additional User

- Select “User Profile” and click “Connect User.”
- Grant permissions for duration and *MyMeter* access.

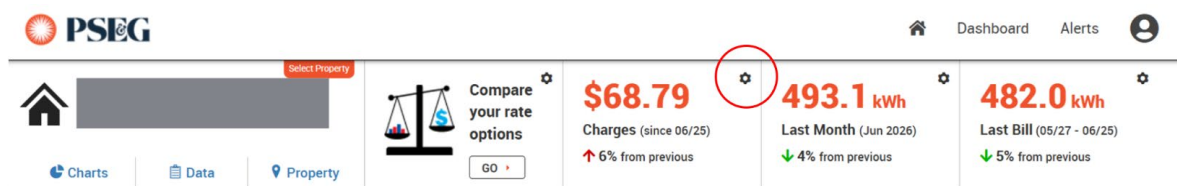

The screenshot shows a web form titled "Add Additional User" with a red header bar. The form is divided into three main sections: "Permissions", "Duration", and "Select Accounts".

- Permissions:** Includes a checkbox for "Usage Data" with a blue icon.
- Duration:** Includes radio buttons for "30 Days", "60 Days", "90 Days", "Select An End Date", and "No End Date".
- Select Accounts:** A list box containing two house icons, each with a checkbox.

Below these sections are two text input fields labeled "Additional User Email" and "Additional User Email Confirm". At the bottom, there is a disclaimer: "Additional user access is only for MyMeter, and does not apply to the specified contract account in My Account." and two buttons: "Close" and "Continue".

Customize the Widgets on Your Dashboard

- Use the gear icons to select which billing and usage widgets you want displayed.

Use the Rate Comparison Tool

- Select a date range and compare rate options.
- An analysis comparing your current rate and another rate will display below the rate options. You can also click the 'What If Analysis' link to update your usage to include expected future electric use, like charging an electric vehicle.

Current Rate
✓ Lower Cost

Request Rate Change

Residential Service (RS)	
Electric Charges:	\$616.36
Service Charges	\$12.00
Totals	\$628.36

[What If Analysis](#)

Residential Time of Use - 3 Period (RS3P)	
Electric Charges:	\$667.50
Service Charges	\$12.00
Totals	\$679.50

[What If Analysis](#)

The analysis above compares your total bill under your current electric rate for the selected period with what your bill would have been under the alternate rate you selected. It shows which rate would have resulted in a lower bill based on your historical usage. To change the time period used in the rate analysis, adjust the slider below and click "Compare Rates."

To update your usage based on expected future electric use, click both "What If Analysis" links above. Examples may include adding electric vehicle charging or shifting electricity use to different times of day.

Even if RS-TOU 3P (Time of Use) shows a higher cost than your current rate, you may still save money by shifting the use of large electric appliances outside the peak hours of 4 p.m. to 9 p.m. For example, consider using electric vehicle chargers, pool pumps, washers, dryers, and dishwashers during overnight off-peak hours.

Guaranteed Bill Protection
Try our new Time of Use rate for the first 12 months risk-free. Switch from your current Residential Service (RS) electric rate to the RS-TOU 3P rate. If you do not save money compared with the RS rate after the first 12 months, we will automatically credit your account for the difference. You may also switch back to the RS rate at the end of the 12 months.*

*NOTE: Current Residential Load Management (RLM) rate customers may switch to the RS-TOU 3P rate. If you do not save money after the first 12 months, we will automatically credit your account for the difference. However, you cannot switch back to RLM at the end of the 12 months; you must switch to the RS rate.

If you receive an error message while attempting to switch to RS-TOU-3P, please email PSEG-TOUEnrollment@pseg.com for assistance.

7/2025 7/2026 - 8/2026

The total bill amounts provided by the Rate Comparison Tool will be different from the monthly electric bills that you received from PSE&G. The Rate Comparison Tool uses your historic electric usage on current rates. In addition, this analysis does not include any special credits or adjustments. To learn more about your electric bill, click [here](#).
